2 Project Background and Objectives

With an aim to make India clean, the Swachh Bharat Mission (Urban) was launched by the Government of India on 2nd October 2014. One of the key goals of the mission is to achieve 100% scientific processing of municipal solid waste (MSW).

As per the goals and objectives of the Swachh Bharat Mission, Ankleshwar Nagarpalika wished to set up the plastic waste processing/recycling plant in the Ankleshwar city to reduce the amount of plastic waste going on the landfill site.

As per Plastic Waste Management Rules 2016 *plastic waste means any plastic discarded after use or after their intended use is over. Plastic is defined as material which contains as an essential ingredient a high polymer such as polyethylene terephthalate, high density polyethylene, Vinyl, low density polyethylene, polypropylene, polystyrene resins, multi-material like acrylonitrile butadiene styrene, polyphenylene oxide, polycarbonate, polybutylene terephthalate.* It is to be noted that this definition is intended to be indicative in nature. The exact scope of work and other details will also be finalized at the time, and a tender process will thereafter be followed.

According to the Integrated Solid Waste Management (ISWM) hierarchy, recovery and recycling is preferred waste management strategy after source reduction and reuse. Recovery of the recyclables should be adopted before planning for any waste processing or treatment facilities. Non-biodegradable waste such as plastic, paper, metal, glass, e-waste etc should be recycled separately in the individual recycling plant.

Objectives of Setting up Plastic Waste Treatment Facility in Ankleshwar Municipal Region on PPP basis are:

- 1) To handle, collect and recover the plastic waste from the main stream solid waste management system.
- 2) To reduce the volume of plastic waste disposed at the landfill
- 3) To save the cost in transportation and disposal of the waste
- 4) To provide livelihood opportunities for informal sector in the recovery and recycling industry
- 5) To encourage the use of recyclable products and thereby reduce the environmental impacts

This EOI intends to shortlist agencies capable of taking up the project of setting up the plastic waste treatment facility in the city.

3 Project Details

As per Plastic Waste Management Rules 2016, it is the duty of the local authority *to develop and set up infrastructure for segregation, collection, storage, transportation, processing and disposal of the plastic waste either on its own or by engaging agencies or producers;*

Ankleshwar Nagarpalika intends to set up the plastic waste treatment facility in Ankleshwar Municipal Region on PPP Mode where the bidder shall be responsible for setting up the plastic waste treatment and recycling plant on PPP basis for the period of 20 years.

Land for setting up the plant will be provided by Ankleshwar Nagarpalika on lease at Rs. 1 per sq.m of the area per year. The bidder shall pay the rent to Ankleshwar Nagarpalika for providing the land for treatment facility.
